Identify issue in this code

```
Int fact(int n) {  
    If (n==0) return 1;  
    Return n*fact(n-1);  
}
```

Other small notes

Think of Scale - have search / filters / sort options if and wherever possible

While showing demo, have two browsers and each open in simple mode and incognito mode. So you have easy way to show the workings of 4 stakeholders on same webportal (Admin role, Student role, Instructor Role, Advisor role)

Do mention clearly individual contributions in PPT
